

Modular Cable Rollers

cable trackway rollers for use during transpooling or offshore cable operations

Vulcan Offshore have developed an innovative modular cable roller system for use for various offshore operations. The Modular Cable Rollers can be setup in multiple configurations adding sections or additional rollers as needed.

Applications:

- Transpooling
- Cable loading/unloading
- Cable recovery/deployment on deck

Features:

- Modular system, add multiple roller sets.
- Easily adjustable height set by locking pins
- Option to bolt/weld to the deck
- Option to use with concrete blocks
- MPI tested lifting points
- Stainless Steel bearing rollers
- Mild steel construction

Modular Cable Rollers

options

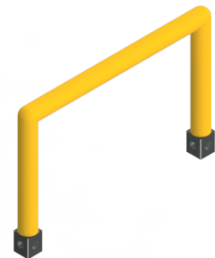

1000mm Short Leg

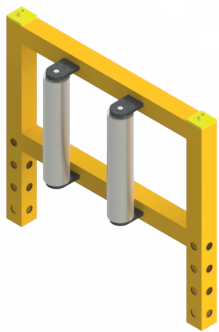

2175mm Leg and Roller

Round Dummy Roller Side

Horizontal Connectors
300mm / 500mm / 1000mm

Horizontal Roller
